

IEEM

Integrated Economic - Environmental
Modeling Platform

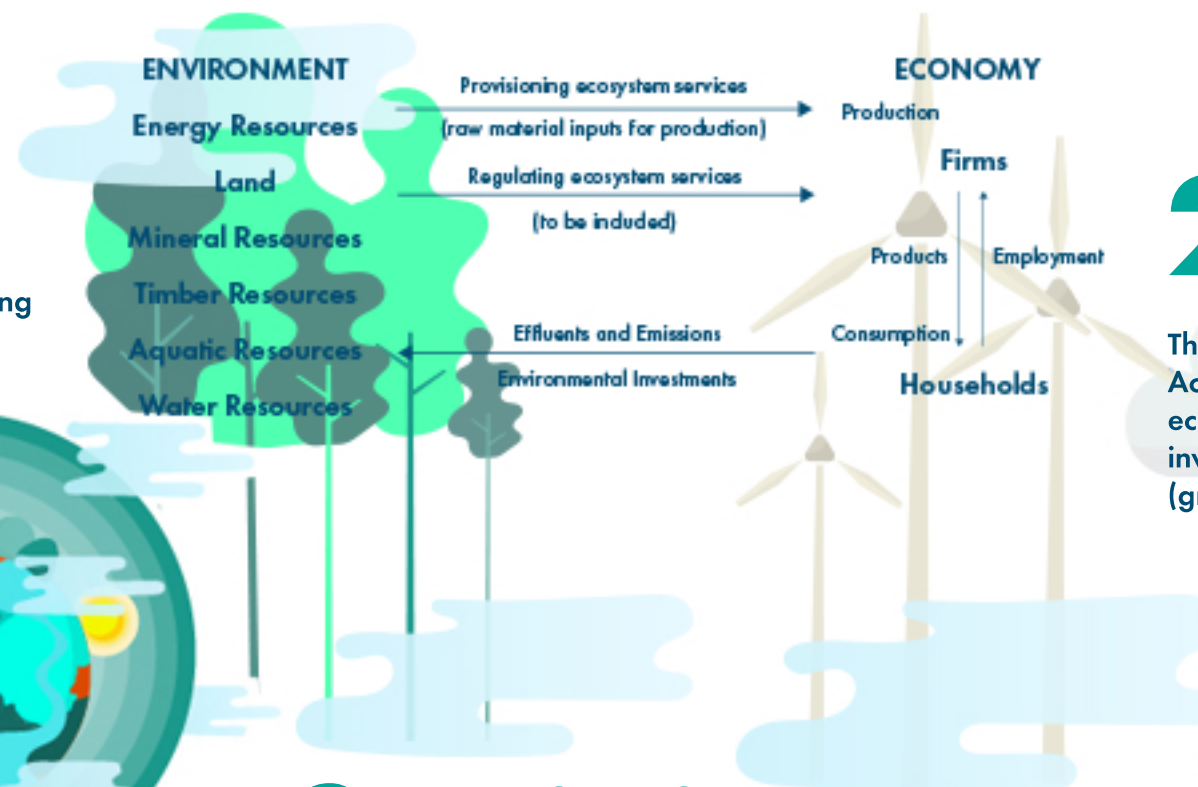

4 WHAT IS THE BENEFIT?

IEEM's language is very much economic which helps create openings for dialogue with Ministries of Economics and Finance. IEEM supports countries in prioritizing actions relevant to achieving the Sustainable Development Goals and actions related to green growth and climate change.

1 WHAT'S NEW?

Publication of the first environmental-economic statistical standard (SEEA- System of Environmental-Economic Accounting), and; advances in economic modeling.

2 WHY IS CRITICAL FOR IEEM?

The SEEA is compatible with a country's National Accounts. This enables the modeling of entire economies and the evaluation of public policy and investment impacts on economic and environmental (green and brown) indicators.

3 WHY IS THIS IMPORTANT?

The integration of natural capital in IEEM makes it possible to analyze impacts not only on economic flows (gross domestic product), but also on the wealth of a nation which is fundamental for the economic growth and development of future generations.
