## Japan Special Fund and Japanese Trust Fund for Consultancy Services Annual Report 2001

### 1. Background

In 1988 the Government of Japan (GoJ) created the Japan Special Fund (JSF) to provide financial assistance for the Bank's technical cooperation (TC) activities in the Latin American and Caribbean region. All IDB borrowing member countries are eligible to apply for funding. The JSF is non-reimbursable and finances activities in specific sectors as defined by the GoJ. Originally focused on the infrastructure and environmental sectors, in 1998 the GoJ expanded the project areas eligible for JSF funding to include the social sectors and emergency finance. In the year 2000, they were revised again based on the development issues currently confronting the region (see box below).

#### Priority areas financed by the Japan Special Fund

(Text extracted from IDB Memorandum dated August 15, 2000)

*The GOJ has expressed a special interest in funding projects in the following priority areas:*

**1. Social Sectors**

- health
- education
- nutrition
- water and sanitation
- social protection and other activities that directly address social development

**2. Environment**

**3. Women in Development**

- including support for gender-specific initiatives

**4. Finance**

- for emergency relief due to macro-economic instability

*Other priority areas include:*

- civil society
- private sector
- natural disasters
- regional cooperation

*Additionally, please note:*

- Activities related to capacity-building of state and local governments, civil society, etc. may be financed as a component of an approved JSF technical cooperation project.
- The Japanese Trust Fund for Consultancy Services (JCF), which funds all IDB sectors of work, will now serve as the primary source of Japanese technical cooperation financing for infrastructure projects.

On April 2, 2001, the GoJ set aside US\$30 millions from the JSF resources for the Poverty Reduction Program (JPO). The program was established for a period of five years (2001-2005) with an annual budget of US\$6 millions. The JPO is non-reimbursable and finances activities related to poverty reduction. Similar to JSF, the JPO resources are untied and all IDB borrowing member countries are eligible.

The GoJ created the Japanese Trust Fund for Consultancy Services (JCF) in 1995. While all borrowing member countries are eligible to apply for funding, unlike the JSF, the JCF's resources are semi-tied (50%) to Japanese consultants or consulting firms. The JCF is also non-reimbursable and finances projects in all sectors where Japanese expertise is available.

## 2. Overview of 2001

At the beginning of the year 2001, the JSF/JCF identified an overall demand for funding of more than US\$48 million. A continued reliance and strong expectation of the users has been demonstrated toward the Japanese funds financing.

A total of 29 JSF/JPO projects for US\$16.6 million were approved by the Bank by year's end, including 6 projects, totaling US\$2.5 million for JPO (Poverty Reduction Program). Some 51% of these projects were in the social sector, followed by 32% focused on infrastructure and 17% in environment sector. A & B countries made up 39% of those receiving support. C & D countries received 53% of the financing, followed by regional projects (8%). The individual countries which most benefited from the JSF/JPO in 2001 are Colombia (13.5%--US\$2.2 million), Uruguay (11.1%--US\$1.8 million), and Brazil (9.9%--US\$1.6 million).

The JCF has become the largest of the 28 smaller funds established within the TC funds program managed by the Bank. In 2001, 5 projects worth US\$2.9 million were approved by the Bank. The principal sectors of JCF financing are infrastructure and environment.

The cumulative approvals to date of the JSF are US\$ 162.9 million (excluding US\$29.7 million corresponding to the Japan Program) and US\$ 16.9 million of the JCF.

### ROLE OF JSF IN BANK'S TC PORTFOLIO IN COLOMBIA

By Javier Leon, Country Coordinator for Colombia

Until March 15, 2002 the portfolio of TC in Colombia consisted of 25 operations (20 directly related to the country and 5 regionals) for an amount close to US\$24 millions. Grouping the portfolio according to the source of funding, we can conclude that the most representative fund is the Fund for Special Operations (FSO), which finances 10 operations for US\$17.1 millions. It's important to mention that since the beginning of 2001, this source is no longer available for Colombia (the only exception is intra-TCs financed with local FSO).

The second most important source is the JSF with 8 operations for US\$4.4 millions, that represents 18.5% of the active portfolio. When FSO is excluded from the equation, JSF acquires major importance with 64.0% of the active portfolio.

The sectorial analysis of the active portfolio of TCs financed with JSF, allows us to conclude that the fund supports mainly the social areas, poverty reduction programs and development initiatives.

Finally, half of the operations financed by JSF in Colombia, have served to support the preparation of loans.

Towards the year end, various meeting were held with operational divisions of the Regional Departments and Central Departments. The purpose of the meeting was to prepare the 2002 project pipeline and better funding allocation to the most needed sectors and countries. The identified overall funding demand for the JSF and JCF was US\$39.7 million, out of which “A” priority was given for US\$19.6 million, and “B” priority was given for US\$20.1 million.

### **3. Resources**

New contributions from the Japanese Government to the JSF in 2001 were 429 million Yen (US\$3.3 million<sup>1</sup>), bringing the total contributions to 24,634 million Yen (US\$189.5 million). The overall funding available at the end of 2001 was 3,499 million Yen (US\$26.9 million). In 2000, US\$59.7 million was available.

The JCF was replenished by 286 million Yen (US\$2.2 million) this year, and has an available balance of 1,136 million Yen (US\$8.7 million) at the year end. The cumulative contributions total 2,846 million Yen (US\$21.9 million).

#### 4. Approval Process

The following flowchart is applicable for TC between US\$150,000 and US\$750,000.

## **5. Highlights of Approved Projects during 2001**

Among the projects approved during the year, a few are highlighted in this section due to their innovative approach and expected level of development impact.

### **Urban Crime and Impunity in Colombia (Colombia) US\$350,400 from Japan Special Fund**

The project will be to conduct a diagnostic assessment of urban crime in Colombia since the 1960s and to examine the factors causing impunity before the law from the perspective of "bottlenecks" in the criminal investigation process. The project will focus on three principal areas: (1) the diffusion and causes of urban violence, (2) crime locations in various cities and (3) impunity and obstacles to criminal investigation. This TC will produce a database containing information about violent deaths in 30 department capital cities since 1970, and homicide and crime history maps in 5 cities that will constitute an important tool to diagnose and to assess the functioning of the criminal justice in Colombia.

### **Sustainable Development Program Lempa River Watershed (El Salvador, Honduras y Guatemala) US\$700,000 from Japan Special Fund**

This TC supports the initial phase of execution of a trinational lending operation that will provide El Salvador, Guatemala and Honduras with three separate loans totaling \$21.8 million to support sustainable development of the Upper Lempa River Basin. The TC provide assistance to the local government in: (1) the preparation of a participatory trinational agenda, (2) prepare environmental and financial management models that will be

implemented using loan resources, and (3) support the integration and operation of the national committees of involved parties and establish trinational community forums to channel the participation of area communities and civil society in program execution.

### **Support Organizations for the Elderly (Argentina, Bolivia, Chile and Peru) US\$750,000 from Japan Special Fund Poverty Reduction Program**

This is the first program in the Bank dedicated exclusively to addressing the needs of the poorest of the elderly in Latin America and improving their quality of life. This TC will strengthen organizations of older adults that benefit the elderly in Argentina, Chile, Peru and Uruguay and improve the capability of a regional network and seven national networks to support these organizations. The resources will finance leadership courses for

2,380 elderly persons and strengthen more than 3,000 organizations that benefit the elderly. Technical assistance and training will be provided to coordinate activities of public agencies and civil society that are working to fulfill unmet needs of senior citizens, and a project bank will be established. The program will be carried out by HelpAge Bolivia and Red Tiempos, based in Santiago, Chile, together with the ISALUD Foundation in Argentina, the Banco de Previsión Social in Uruguay and the Uruguayan National Network of Older Adults and the Mesa de Trabajo de ONG y Afines in Peru. Although this is an untied operation, the team will seek a Japanese consultant to learn from Japanese experience in the area.

### **Education Connectivity Pilot Project (Uruguay)**

**US\$748,200 from Japanese Trust Fund for Consultancy Services**

The purpose of this TC is to prepare the design and implementation of a pilot project to introduce new information technologies to support initiatives that contribute towards enhancing the teaching and learning process. In addition, the program will facilitate access to new information technologies by students and teachers of all educational levels (primary, secondary and technical). The GoJ approved the TC during the Uruguayan's president visit to Japan in 2001. Japanese technology and experience will be use throughout the project.

## **6. Highlights of Projects in Execution**

### **Sustainable Use of Tropical Forest in Acre (Brazil)**

**US\$750,000 from Japan Special Fund**

The objective of the project is to increase incomes of “seringueiros” by introducing new economic activities in one reserve. These activities will focus on maintaining an ecological balance necessary to sustain production while increasing the level of extraction, processing, and marketing of multiple forest products which include timber, seeds, nuts, rubber, resins, oils, honey, and medicinal plants.

The program has two complementary components: (a) Multiple use Forestry Management, which will introduce forest inventory and harvesting techniques for selective extraction of timber and non-timber products. (b) Investments in Human Capital Resources, which will increase the level of education, health, and community services available to seringueiros in two extractive reserves.

## **Support for Developing a Sustainable Public Transit System in Cuenca (Ecuador) US\$700,000 from Japanese Trust Fund for Consultancy Services**

Comments by the Team Leader:

### **Public Transit System in Cuenca**

By Rodolfo Huici, team leader.

The Bank identified the necessity of work in the public transportation systems of the medium size cities, since they are presenting problems which should be resolved timely in order to provide orderly and efficient growth in the sector. Cuenca, because of its importance among Ecuadorian cities and strong leadership and political motivation, represented a very important pilot case. This interest was shared by the JCF which approved the resources through ATN/JC-6364-EC.

The problems were (i) infrastructure: incomplete arterial network, lack of maintenance and drainage of pavements, inadequate traffic signals and security; (ii) operations: inadequate bus fleet, routes and stops, disordered transfer centers and obstacles to continuous bus flow; (iii) regulators: new responsibilities given by the Constitution to local authorities; (iv) institutional: for regulation and *fiscalización* of the services; (v) service providers and their adjustment to new system; and (vi) environmental quality related with pollution and noise. The project brought about a short term operational plan, which recommended improvement of bus operations, fleet modernization, review of traffic flow at Historical Center, and highway infrastructure.

The essential point to the success of the project was the structure of the consulting group. Under the leadership of a Japanese firm and its associate, the consulting group integrated two Latin American firms. This integration and the functional division among the firms allowed exchange of Japanese firms' know-how and technical advantage with Latin American firms' experience and understanding. This conjunction of different capacities will be taken as model for other projects.

## From IDB's Press Releases

During 2001, the following three JSF projects were mentioned in the IDB's Press Release:

1. Developing a Sustainable Urban Transportation System for Arequipa (Peru) US\$1,000,000 from Japanese Trust Fund for Consultancy Services  
<http://www.iadb.org/exr/PRENSA/2001/cp18301c.htm>
2. Sustainable Development Program Lempa River Watershed (El Salvador, Honduras y Guatemala) US\$700,000 from Japan Special Fund  
<http://www.iadb.org/exr/PRENSA/2001/cp12901c.htm>
3. Integrated Management of the Patos Lagoon Estuary (Brazil) US\$750,000 from Japan Special Fund  
<http://www.iadb.org/exr/PRENSA/2001/cp5201c.htm>

**Inter-American Development Bank**  
**Banco Interamericano de Desarrollo**

**PRESS RELEASE**  
**COMUNICADO DE PRENSA**

March 18, 2001

**BRAZILIAN FOUNDATION, IDB SIGN US\$750,000 GRANT FOR ENVIRONMENTAL MANAGEMENT AND FISHERIES PROGRAM IN RIO GRANDE DO SUL**  
**Resources from Japanese Special Fund**

**SANTIAGO, Chile** - Inter-American Development Bank President Enrique V. Iglesias and the dean of Research and Postgraduate Studies of the Federal University of Rio Grande Foundation, Milton Lafourcade Asmus, today signed documents for a US\$750,000 donation that will support an environmental management and fisheries program in the estuary of Lagoa dos Patos, in the Brazilian state of Rio Grande do Sul.

Mr. Koji Tanami, special adviser to Japan's Finance Minister, signed the documents as a witness of honor. The grant resources for this project will be provided by the Japanese Special Fund.

The program supported by the IDB will help restore the environmental quality of the estuary of Lagoa dos Patos, as well as its fisheries, building a base for the economic recovery of local communities.

## 7. Initiatives Taken During 2001

### Creation of Poverty Reduction Program of the JSF

Pursuant to the announcement made by the Governor for Japan at the Bank's annual meeting in New Orleans in March 2000, the GoJ established Poverty Reduction Program (JPO) in April 2001, setting aside US\$30 million from the JSF resources. This is a five years (2001~2005) program with an annual budget of US\$6 million, with the purpose of

financing non-reimbursable TCs related to poverty reduction activities. During the first year of the program, JPO approved the following 10 projects totaling US\$4.1 million (See box below).

<b>LIST OF JPO OPERATIONS APPROVED IN 2001 BY GOJ</b>		
Social Indication for the Monitoring of Poverty Alleviation	Mexico	US\$569,000
Support of a Social Reform Program	Colombia	US\$228,000
Preparation of the Poverty Reduction Strategy	Guatemala	US\$750,000
National System for Monitoring Poverty Indicators	Honduras	US\$150,000
Development of Organization of Older Adults	Regional	US\$750,000
Design of a Subsidy Prog. for the Water and Sanitation Sector	Colombia	US\$191,000
Program to Elaborate a Poverty Reduction Strategy	Dom. Rep.	US\$610,400
Management of Environmental Risk in Low Income Human-Resettlement in Central America's Urban Areas	Regional	US\$210,000
Reorganization of Health Services Networks	Colombia	US\$209,000
Accelerating Rural Energy Coverage	Panama	US\$400,000

### **Cancellation of unused balance**

Given a mixed perspective of the available JSF/JCF resources for the coming years, the JSF team undertook a review of the concluded projects with the unused balance of resources. The idea has been to reintegrate unused money to the funds and recycle them for new projects. During the 2001, 20 concluded projects were identified with unused balance and the total amount of US\$2,429,997 was successfully recovered to the JSF account.

### **Promotion mission to Japan**

A mission was sent to Japan in June with the purpose of promoting Japanese consulting firms' active participation in the IDB development programs, particularly in TC operations funded by JSF and JCF. The core activities of the mission in Tokyo were (1) Dissemination of Bank's operational rule and practice in project execution, and exchange of opinion/experience through a panel discussion with the participation of a wide range of Japanese consulting firms, (2) Explanatory meetings on information technology projects with JCF financing, and (3) Meeting with ECFA (association of major consulting firms in Japan) to discuss on how to promote the Japanese technology and the development experience in IDB projects. The activity (1) had a participation of 25 firms and for (2) 30 firms participated very actively.

### **ECFA mission to Washington**

ECFA sent a mission to Washington in March, to make a presentation titled, "Application of Japanese development experience in the field of Urban Housing, SME, Education, Health and Environment" at the IDB and the World Bank. We organized a presentation meeting at the Bank which had a participation of about 50 operational staff of the Regional Departments and Sustainable Development Department. The result of the

presentation was surveyed among the participants through questionnaires and conveyed to ECFA.

### **Establishment of JSF/JCF web site**

The JSF Team, with the assistance of Bank technical units, established two web sites in April: one for Bank internal use (intranet) and another for public access (internet). Both web sites provide background information, give guidelines on how to apply, contacts, list of projects approved and in the pipeline, and links to other Japanese development institutions. Additionally, the internal web has disbursement and status information about all projects financed with JSF/JCF/JPO funds.

Intranet: <http://re2.iadb.org/jsfund>

Internet: <http://www.iadb.org/jsfund>

## **8. Monitoring and Evaluation**

During October, the JSF team organized a monitoring and evaluation mission to review the performance of ongoing projects and evaluate the results of recently completed technical cooperations projects financed by JSF, JCF or JPO in Mexico (ME) and Costa Rica (CR). Among all the TC projects executed in these countries, the following six were selected for monitoring and evaluation:

### **Model Maternal and Child Health Care for Indigenous Population (Mexico) US\$554,300 from Japan Special Fund**

This project was approved by the GoJ in 1998 and started execution in 1999. The objective was to design and test the tools to target the principal causes of mortality and morbidity in mothers and their children in indigenous populations. It focuses on maternal and prenatal diseases, malnutrition, childhood diseases preventable through immunization and health education, sexually transmitted diseases, and family planning.

A total of 15 indigenous communities and 4,583 indigenous people participated in the pilot program. With JSF funding and community work, 14 community houses were rehabilitated to provide health services. About 90 health care providers were trained with modern and traditional health services. Textbooks, posters and educational materials were produced, published and distributed with Japanese funding to teach health practices among the participating communities.

**Ground Water Recharge Ecological Conservation Zone of the District (Mexico)**  
**US\$ 960,000 from Japanese Trust Fund for Consultancy Services**

This project was approved by the Japanese Government in January 1997 as the first JCF project for which the cost of Japanese consultants was financed. The project started on February 8, 1999 and was finished in June 2000. The objective of this TC was to develop a prefeasibility study to formulate a strategic plan for the rainwater management and ground water recovery of the Ecological Conservation Zone of Mexico City Valley.

The TC project provided the necessary studies for the executing agency to identify the need for future investment projects that will contribute to ground water. It identified 38 priority projects and 4 pilot projects that are estimated to recharge the aquifer with 3 m3/sg, which would be approximately equivalent to the supply water used by 500,000 people. The recharge will also improve the quality of the ground water. The Federal District authorities expressed their satisfaction with the study prepared by this TC because it served as the basis for the management of the Ecological Conservation Zone.

**Social Indicators Poverty Alleviation (Mexico)**  
**US\$569,000 from Japan Special Fund Poverty Reduction Program**

This is the first TC program financed under JPO. The project was approved in May 2001. The objective of this operation is to support the efforts of the new administration in developing mechanisms and indicators for monitoring poverty alleviation strategies and programs and to prepare a IDB loan (US\$10 million) to consolidate indicators for the poverty area and expand to other areas. The products delivered by this TC are: (i) Inventory of information produced by the different government entities on social conditions to produce a Social Information System; (ii) Evaluation and monitoring of social programs and targeting of population in extreme poverty; and (iii) Briefings on Social Conditions for the President, background information for his speeches and his working program (See box below with Mexican Government's comments about the project).

**“Social Indicators for the Monitoring of Poverty Alleviation”**

Ulises Cárdenas, Presidency of the Republic of Mexico Statistical Studies Center  
(In Spanish)

En el contexto de la globalización, la adopción de una Política Social es determinante para dotar a la población marginada con las herramientas necesarias que le permitan superar la pobreza. Para esto es necesario identificar el nivel de pobreza y la situación de las personas a las que se identifican como pobres en la región para después crear una estrategia de política que mejore su situación al ampliar las capacidades, generar oportunidades, fortalecer la protección social y contribuir a la formación de un patrimonio. Como un esfuerzo para acordar de manera abierta y profesional una metodología para la medición de la pobreza en México que cuente con carácter y validez oficial, se creó el Comité Técnico de Medición de la Pobreza en el que participan el sector público y la academia. El SIS participó activamente en el cálculo de la pobreza con diferentes metodologías de manera que se pudiera observar la sensibilidad de la cifra de pobreza ante pequeños cambios en la forma de cálculo. En lo que se refiere a la estrategia de combate a la pobreza el SIS participo en el diseño de la estrategia de Política Social

(Continues to next page)

de México llamada *Contigo*. Paralelamente, el SIS coordinó el flujo de información de los programas sociales de todas las dependencias involucradas en la estrategia *Contigo*.

Con el objetivo de permitir al Presidente y a su Gabinete Social dar seguimiento a la Nueva Política Social el SIS es la oficina encargada de administrar y coordinar el contenido del Tablero de Control de la Política Social *Contigo*. Este tablero cuenta con indicadores relevantes y oportunos en materia social que facilitan la toma de decisiones puntuales e inmediatas de alto nivel. Sistemas similares están comenzando a implementarse por algunos estados del país.

Por otro lado, la rapidez con la que se materializó la Cooperación Técnica TC-01-03-002 permitió aprovechar el impulso inicial de la nueva administración del Presidente Fox y la voluntad de cambio respecto a la forma de aliviar y atacar los problemas sociales del país. La pronta puesta en marcha del proyecto logró potenciar los alcances y multiplicar el impacto de las acciones llevadas a cabo por el SIS.

#### **Summary In English**

Mexican government established the Technical Committee for Poverty Measurement with the purpose of agreeing transparent and professionally on a methodology to measure poverty with the participation of public and academic sectors. The Social Indicators System (SIS) played an active role in designing of the social policy strategy called *Contigo*. SIS also coordinated flow of the information on various social programs. SIS will be responsible to administer and coordinate the contents of the Control Panel of *Contigo*, so as to help the President and Social Cabinet to follow the development of New Social Policy.

The rapid response of the Japanese fund through this TC made it possible to take full advantage of initial impulse of President Fox's new administration and the willingness of change to alleviate and attack social problems of the country. And the rapid implementation of the project widened the scope and multiplied the impact of the actions taken by SIS.

### **System of Conservation Areas (Costa Rica) US\$1,937,000 from Japan Special Fund**

This project was approved by the GoJ in 1991, begun in 1997 and was finished in 1999. The objective of this TC was to prepare studies aimed at establishing alternative natural resources management methods for the purpose of making protected areas financially self sufficient and to identify sources of employment for nearby communities.

The technical cooperation developed prefeasibility and feasibility studies that would build up Management Plans for the six national parks. Another component, strengthening the Office of the Director of National Park Services (SINAP), has been very successful. Originally there were three separate divisions in charge of Costa Rica's natural resources within the Ministry of Environment and Energy. In October of 1995, the protected areas were grouped in eleven conservation areas and their administration was centralized in the SINAP. About 470 people were trained through courses, workshops, and modules and a five-year training program was prepared in accordance with the Management Plan.

**Training Agronomist in Sustainable Agriculture (Regional)  
US\$1,000,000 from Japan Special Fund.**

This project was approved by the GoJ in 1996 and started in 1996. The objective of the program was to finance 18 full scholarships for EARTH<sup>2</sup> students and a Japanese expert in organic agriculture for a three-year period to assist EARTH in establishing an experimental farm of organic agriculture and to teach students, faculty, and farmers from surrounding communities about integral organic production.

With the help of a Japanese expert financed with JSF, EARTH established experimental organic programs. The mission visited a specific program called Bokashi, which began in January 1998 and is still in execution. Bokashi is an organic fertilizer made from dry fibers placed on corrals or stables to catch waste materials and food dropped by animals (See Box below for beneficiary's comments ).

**JSF Project at EARTH University**

By Shuichi Okumoto, EARTH Professor

In 1996, EARTH University was granted a \$1 million fund for scholarships and for the assignment to EARTH of a Japanese technical specialist in organic agriculture in the person of Masaki Shintani who was with the faculty from June 1996 to January 2001.

With M. Shintani at EARTH University a formal course was developed as an elective senior course, devoted to Organic Horticulture. This course attracted a large number of students. The arrival of the technical specialist coincided with the start-up of EARTH's Integrated Organic Farm of which the technical specialist was among the advisers.

His contribution allowed the setting-up of many new technologies together with some student-research advised by the specialist: Organic banana research, vegetable farming research, seed production of introduced materials, and the setting up of experimental plots. This progressed into such aspects of the Bokashi Production Technology (Bokashi is a fermented organic fertilizer) that has now been replicated all over Costa Rica, Ecuador, Colombia and Guatemala. This also produced an effect on the management of farm wastes such as banana rejects, sawdust, cattle manure and even waste water using EM (effective microorganisms). The effect of waste management for environmental protection has also been replicated all over Costa Rica and other Central and South American countries. Another effect is the work on organic chicken production

(Continues in next page)

<sup>2</sup> EARTH (Escuela de Agricultura de la Region Tropical Húmeda) is a private, non-profit, international university contributing to the sustainable development of the humid tropics through education in agricultural sciences and natural resources.

under range pasture and this has been extended to organic meat and milk production and later to organic shrimp production

The multiplier effect of the project has been seen and there is surge of organic production in Costa Rica and the change in attitudes in agricultural production that now allows many professionals (especially the EARTH professionals) to demonstrate that indeed it is possible to do organic agriculture. This is a sea change and many of the students who have started in such courses here are now providing leadership in organic banana production in Ecuador and Colombia and organic horticulture in many countries. With his participation many international seminars had been set-up on organic agriculture and this continues even after his stint to the point that BID even provided funding on a special seminar that brought in many organic agriculture practitioners together to share their experiences.

### **Feasibility Studies for Urban Sanitation Program (Costa Rica)** **US\$4,870,000 from Japan Special Fund**

This project was approved by the GoJ in 1991. The objective of this TC was to cooperate with the government in the preparation of two studies to elaborate final designs of the sanitary sewerage system: one in the Greater Metropolitan Area and another for eight intermediate cities. The original plan was to execute the investment project through an IDB loan but now it will be through the private sector. Although the investment scheme changed, the studies provided by this TC served as the basis for the concession. The executing agency was not able to fully use this feasibility study because the area for the concession project will be slightly larger than the one defined for this TC. However, the executing agency did use the model, collector's topography, design of transportation system of sewerage, localization of sewerage treatment plants, unit cost estimates and the environmental study.

Colombia	Support for Coordination between the Special Indigenous Judicial System and the National Judicial System	Social	650,000	6/25/01	The general objective of the operation is to improve access to basic justice services in order to extend social protection to the populations living in indigenous territories, who have traditionally lacked access to the services of the State. The specific objectives are; (a) carry out the studies and consultations that will serve as a basis for coordination between the indigenous judicial systems and the NJS and the establishment of a suitable regulatory framework; (b) enhance the quality of justice services in indigenous territories and the areas surrounding them; (c) increase the legal security provided by the system in order to improve conditions for private investment; (d) to support strengthening of the CSJ in order to prepare it to fulfill its role as coordinator of the justice system and guarantee the population access to the basic administration of justice.	TC0011050
	Urban Crime and Impunity in Colombia	Other	350,400	6/25/01	The objective of the research is to explore and explain urban crime in Colombia since the 1970s. Micro-data and geographical information systems will be used. Factors determining impunity, in terms of bottlenecks in the criminal investigation process, will also be analyzed. It is hoped that, based on the results of the investigation, policies will be suggested for the prevention of violent crime, the safety of the population, and the functioning of the justice system.	TC0011081

Ecuador	Coastal Resource Management Program Phase II - Feasibility Studies -	Environment	550,000	4/17/01	The objective of the technical cooperation will be to provide funding for the preparation of feasibility studies for the Coastal Resource Management Program Phase II - PMRC II (EC-0193). With resource of this operation, a consulting firm will deliver needed studies in order to; foster an effective policy framework, identify appropriate financial mechanisms, replicate good practice in coastal use, and install a reliable information and monitoring system.	7706
El Salvador	Design of a Sustainable Development Program for the Lower Rio Lempa	Social	298,650	4/17/01	The purpose of the technical cooperation is to design an integrated program for vulnerability reduction and sustainable development of the Lower Rio Lempa, including natural disaster mitigation and prevention, to be considered for Bank financing (ES-0133). The specific objectives are; (a) to define, analyze and compare feasible alternative integrated solutions to mitigate the vulnerability of the communities of the Lower Rio Lempa; (b) to select and design in a participatory manner, the "optimal" integrated solution for the sustainable management of the Lower Rio Lempa..	7553
	Support for the Implementation and Monitoring of the Reconstruction Program	Infrastructure	750,000	6/14/01	The objective of this operation is to support the efforts of the Government of El Salvador in the reconstruction program by helping to develop systems to monitor the financial and physical execution of reconstruction. These systems will provide support for the formulation of reconstruction to the population about the available program.	7685

Hon-duras	San Pedro Sula Water and Sewerage Project	PRI	148,830	2/20/02	Due diligence : This technical cooperation is designed to support studies that are indispensable for the completion of a through analysis by the Bank of this project. Specifically, the team has placed additional emphasis of the Technical, Environmental and Social, and Economic and Market analyses of the Project under this technical cooperation.	TC0110054
Jamaica	Support to the Preparation of Youth Development Program	Social	403,000	6/25/01	The proposed TC will assist the Bank and the Gov. of Jamaica to carry-out diagnostic analyses, preparatory studies and stakeholder workshops, which will allow the development of a comprehensive program to address the needs of at-risk youth in Jamaica. A key feature of youth development is its multi-sector nature, thus requiring an integrated approach, with both public and private sector actors.	TC0106014
Mexico	Corporate Restructuring of ISSSTE (Instituto de Seguridad y Servicios Sociales de los Trabajadores del Estado)	Social	750,000	2/20/02	The objective is to assist the Gov. of Mexico in directing proper attention and resources to the pension and medical funds of the government workers benefit fund. Specifically, this TC will carry-out the studies needed in the preparation of ME-0245 Modernization of ISSSTE with an anticipated amount of \$500 Million from the IDB - for (1) an evaluation of the corporate status of ISSSTE, (2) the needed restructuring to manage the institution, including the modernization of the entire organization to salvage the essential operations in health and pension, and (3) the design and execution of a political and social communication strategy that supports the reform.	TC0110008

Nicaragua	Design of Low-Income Housing Program	Social	327,550	4/17/01	The general objective of this TC is to provide the technical assistance necessary for the housing policy organization, INVUR, to operate the Low-Income Housing Program for Nicaragua (NI-0064) that IDB and the Government have designed. The specific objectives are to: (a) build operational capacity; (b) build technical capacity; and (c) create the institutional structure of INVUR.	TC-0012010
Panama	Sustainable Development Strategy for Bocas del Toro Province	Social	450,000	6/25/01	The objective of the proposed technical-cooperation funding is to support the Government of Panama in laying the technical, socioeconomic, and environmental foundation necessary for participatory formulation of a sustainable development strategy for the province of Bocas del Toro. The strategy will set measures in the short, medium, and long terms that will help; (1) provide guidance and assign priorities for public investment and management; (2) promote and channel private investment; and (3) establish and enforce regulatory frameworks for key development sectors in order to improve the quality of life of the population in the region.	7577
Uruguay	Program to Support the Modernization of Secondary Education and Teacher Training	Social	597,000	4/17/01	1. To support and strengthen the evaluation of ongoing reform programs, so as to make the necessary adjustments while continuing to consolidate the reform of Lower Secondary Education. 2. To carry out the necessary studies for the design and preparation of the new loan operation aimed at deepening the Reform process to include Upper Secondary Education as well as Teacher Training Institutions	7557

Colombia	Support of a Social Reform Program	Social	228,000	5/29/01	The proposed technical cooperation will finance technical assistance necessary to prepare a policy program to improve the impact, effectiveness and coordination in the Colombian social safety net and poverty alleviation programs. Also this TC has as its specific objectives to assist Government of Colombia to prepare feasibility and other preparatory studies for reforms in five key areas of social protection and poverty alleviation; (1) fiscal instruments to assure anti-cyclical financing of the safety net and protect investments in the human capital of the poor during crisis; (2) reforms to the existing mechanism of protection of the elderly poor; (3) targeting; (4) feasibility studies for the reform of labor income protection measures currently in place; and (5) communications and dissemination for policy change.	7556
	Design of a Subsidy Program for the Water and Sanitation Sector	Social	191,000	6/25/01	The overall objective of the Program is to assist GOC to design a Demand Targeted Subsidy Program for the Water and Sanitation Sector. Other objectives are; (1) formulate adequate incentive to water and sanitation companies to invest to insure an increase in coverage to lower income groups and (2) to provide a rational system of subsidies to the poor. In particular the goal is to design a program of subsidies on the demand side, so that water and sanitation companies would have the economic incentive to expand coverage to level 1 and 2, e.i. the lower income groups, which at present have no water and sanitation services.	TC0011079

Colombia	Reorganization of Health Services Networks in Colombia	Social	209,000	8/31/01	The objective is to pilot in three departments of Colombia tools and models for the organization of health services networks. The outcome and lessons learned from this technical cooperation will be used to prepare a new operation: Modernization Program of Health Services Networks in Colombia (CO-0139). The specific objectives of the technical cooperation are; (1) to define the concept and dimension of health services network in different economic, organizational, epidemiological, and population settings; (2) to evaluate the existing referral systems and to define proposals to restructure these systems; and (3) to define and test a limited set of institutional reorganization and managerial proposals for the different types of health services networks.	7650
Dom. Rep.	Program to Elaborate a Poverty Reduction Strategy for the Dominican Republic	Social	610,400	6/25/01	The objective of the program is to provide assistance for; (1) the elaboration of a poverty reduction strategy; and (2) the creation of a technical unit that will support the Social Cabinet to undertake its responsibility to develop and monitor the implementation of social policy.	7568
Guatemala	Preparation of the Poverty Reduction Strategy (PRS)	Social	750,000	5/29/01	The objective is to enable SEGEPLAN to prepare Guatemala's Poverty Reduction Program. The expected results are: (1) a strategy to improve rural productivity, social capital and incomes; (2) a strategy for protecting the poorest and most vulnerable groups against shocks and for improving their living standards; (3) a widespread consensus in favor of the PRS; (4) a strategy within the PRS for decentralization and increased community participation; (5) consistency between the PRS and sound macroeconomic policies; and (6) an execution strategy for the PRS which includes indicators, monitoring and evaluation.	7579

Hon-duras	National System for Monitoring Poverty Indicators (SINASIP)	Social	150,000	5/29/01	The general objective is to support the final design of an institutional framework of high technical standards, which is needed to carry out date collection, analysis and monitoring of the indicators established in the PRS. At the end of this operation, a proposal for the monitoring system, the coordination, the consultation and the dissemination of these indicators will be available.	7507
Mexico	Social Indication for the Monitoring of Poverty Alleviation	Social	569,000	4/17/01	The objective of this operation is to support the efforts of the new administration in developing mechanisms and indicators for monitoring poverty alleviation strategies and programs and to prepare a second operation that will consolidate the poverty area and expand to other area. This technical cooperation are expected to pilot the first phase of a system of social indicators (SIS) which focuses on the monitoring poverty alleviation efforts. The pilot and related activities will be the main project preparatory activities for a second phase, to be financed by a Bank loan (ME-0236) for an estimated US\$20 million. The new operation will add additional areas to complete the system for monitoring poverty alleviation efforts related to state development disparities and anti-corruption and governance indicators. The project is to be prepared during 2001 and to be executed for a period of four to five years.	7438

<i>Ctry</i>	<i>JCF Project Approved in 2001</i>	<i>Sector</i>	<i>Amount (US\$)</i>	<i>Approval of Japan</i>	<i>Purpose</i>	<i>ATN No.</i>
Brazil	Mathematical Models for Billings and Barra Bonita Reservoirs and Comprised Tiete River Sketches within the State of Sao Paulo	Environment	750,000	8/31/01	The objective of this Technical Cooperation is to design, construct and calibrate a modern mathematical model to simulate the water quality in the upper and medium Tiete river basin, including Billings and Barra Bonita reservoirs. This model will be used by different technical organization in Sao Paulo State dealing with water resources such as CETESB, SABESP and the Tiete River Committee. This important planning tool will allow the evaluation of limnologic conditions in rivers and reservoirs and will help the decision makers to assume more appropriated management of the water resources in this region.	7807
Chile	Plan for the Development of the Artisan Fishery Sector of the Vth Region of Chile	Environment	200,000	3/5/01	The objective of this technical cooperation is to conduct an economic and social evaluation of alternative sustainable development scenarios of the artisan fishery sector in the Vth Region of Chile, and prepare a development and investment plan to implement the best alternative. This plan will define the framework for the actions of the different economic and social participants, both public and private, under a common objective for the development of this sector.	7651
	Hydrologic Modeling and Pollution Control Study for the Concepcion and San Vicente Bays	Environment	1,200,000	2/20/02	The objective of the proposed Technical Cooperation is to support the preparation of an integrated long range plan to reduce the pollution in Concepcion and San Vicente Bays to acceptable levels in compliance with current Chilean environmental regulations, and to establish the remediation actions needed first to achieve and then maintain this result. The major product of this operation will be an Environmental Management Plan to operate and monitor the three dimensional model, and to implement the remediation actions necessary to eliminate or minimize the sources of pollutants to the two bays.	TC0101038

<i>Ctry</i>	<i>JCF Project Approved in 2001</i>	<i>Sector</i>	<i>Amount (US\$)</i>	<i>Approval of Japan</i>	<i>Purpose</i>	<i>ATN No.</i>
Guyana	Support to the Preparation of Information and Communication Technology Project	Other	400,000	8/31/01	The proposed technical cooperation will assist the Bank and the Government of Guyana to prepare the detailed design of a comprehensive program to promote the use of the ICT in the public and private sectors. The objective of the proposed TC is to help the Government of Guyana and the Bank to prepare the Loan Document, including detailed terms of reference and bidding documents necessary for project implementation.	TC0011061
Jamaica	Technical Assistance for the Preparation and Implementation of the Information and Communication Technology Loan Project	Other	400,000	6/25/01	The objective of this technical assistance is to support the preparation of key activities necessary to implement the Information and Communication Technology Project (ICT). The ICT Project is a Loan Project from the IDB to the Government of Jamaica for US\$10 million, whose objective is to increase the competitiveness of Jamaica, in order to accelerate the country's economic and social development. The purpose of the ICT Loan Project is to increase the use of ICT in the public and private sector.	TC0011059
Peru	Support for the Lima Urban Transportation Program	Infrastructure	550,000		The objective of this technical cooperation (TC) is to provide technical assistance to the Municipality of Lima to initiate the preparation of the Lima Urban Transportation Program (PE-0187) through the execution of final designs and environmental studies of the first showcase corridor of the envisioned trunk network for public transportation and the development of the corresponding institutional, regulatory and financial framework.	TC0107023
